

SCHOOL

In school you can learn new things
you can swing your wings
to a good future
if you do your homework and learn.

In school you need to write much
and work hard
then you get smart
if you also start accepting challenges.

In school you can also meet your friends
then you can make plans
you can also learn together
and social contacts and group work also matter.

In school you also have fun
when you get things well done.
It can be stressful
but your future will be wonderful.
