

Alive

It's all about feeling alive  
Do you know?  
This little moment

- Sometimes I close my eyes

And then I feel free  
free of pressure  
free of problems  
free of all these thoughts

- free of everything

Yes it's just a little moment  
but it's important so to value your life  
if you're in it you know what you're living for  
everything becomes clear  
and For this little moment you're just living  
you enjoy this life  
and you know you will go on  
no matter how hard  
because you're living for it  
for this little moment

When your hair flies through the wind  
When you feel like flying  
When you feel the bass on your skin  
When your heart beats out of the rhythm  
When the music goes into your mind  
When you feel numb in a good way

This little moment  
So peaceful,  
and ?  
Have you ever had this little moment?  
Well there are many different ways to get it  
Some have to hurt themselves  
Some have to take drugs  
Some have to go out and run  
Some have to drive in a fast car  
like me  
But sometimes a view into the right person's eyes  
is enough  
To \*be\* alive
